

SANTIAGO

SANTIAGO | apparecchio da terra

Lighting fixture for pedestrian and vehicular paths with indirect emission, the minimal design and the lightness of the lamp body make it suitable for outdoor installations without being bulky. Lamp body of different heights (200mm or 600mm) in extruded aluminum profile and without welding points, anodized and subsequently powder coated to provide high resistance to atmospheric agents and UV rays, ground fixing plate made of stainless steel . Optical compartment adjustable from -20 ° to + 20 ° to always ensure the best illumination of the walking area, the aiming is blocked by friction. LED module protected by an extra-clear glass screen (3mm thick) tempered and fixed by resin, to avoid deposits that would significantly reduce the performance of the luminaire. IP67 protection both on the product and on the cable using IP67 connectors.

Source
LED module specially designed to ensure maximum uniformity.

Optics
Roto-symmetrical optic (see table on the side) protected by a tempered extra-clear safety glass screen.

Power supply
Electronic power supply integrated into the body of the fixture, available in standard versions (on-off). Power supply 220-240Vac 50 / 60Hz.

Note
We recommend the use of the SPD protection device, supplied by us upon request.
