

TILT

TILT | lampada da tavolo

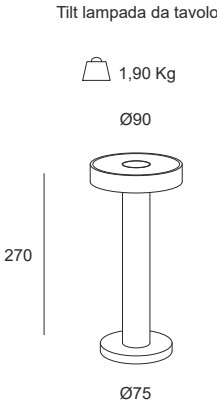

Wireless rechargeable LED table lamp, suitable for use in outdoor areas such as swimming pools, terraces and dehors. Thanks to its very low weight and very long charge duration, TILT is a flexible fixture that can be adapted to any use in outdoor areas. The device is recharged via wireless charging by placing it on the base supplied. Body made of powder coated aluminum alloy to provide high resistance to atmospheric agents and UV rays. Reticulated polycarbonate diffuser designed to guarantee maximum opening of the light beam. Turning the device on and off touchless, possibility of adjusting the intensity of the light and the Kelvin gradation.

Source
LED modules specially designed to ensure maximum optical aperture.

Optics
Rotosymmetric emission (see table alongside), protected by reticulated polycarbonate screens.

Power supply
Driver and rechargeable battery integrated in the fixture body. 220-240Vac 50/60Hz power supply via wireless charging base with USB-C cable supplied.

Note
Charging time via USB-C: 6.5h. Battery life: 10h@25°C.
Wireless charging base with 1.5m USB cable.
