

31X18.4 | profilo lineare

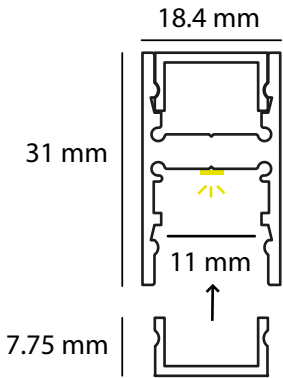

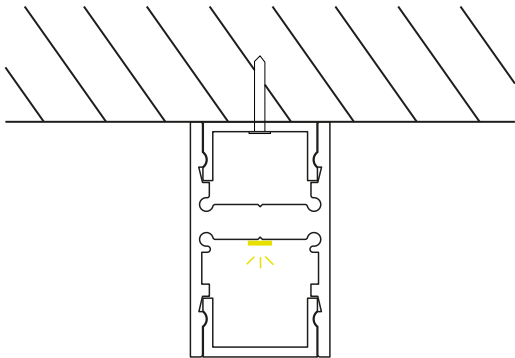

Our aluminum profile with ceiling or suspension installation, using the appropriate cables, represents the ideal solution for modern and discreet lighting. Made from high-quality materials, the profile offers a combination of functionality and sophisticated design. With an internal width of 11 mm, the profile is perfectly suited to a wide range of applications, ensuring uniform light distribution and a feeling of elegance.

The profile allows, through suspension installation, to apply the light source both in the lower and upper part, thus providing complete lighting.

The anodized aluminum profile offers superior corrosion resistance and exceptional durability, ensuring that the structure remains unchanged over time. The Silver, White or Black finish allows the profile to be integrated into different design aesthetics, ensuring versatility that adapts to any context. The opal polycarbonate diffuser ensures uniform diffusion of light, minimizing the glare effect and creating pleasant and comfortable lighting.

With a total power of up to 14.4 W/m, this aluminum profile is able to offer excellent ambient lighting, adapting to the specific needs of each space.
